Brian,

Just getting back in the office. Regarding an update, we forwarded the material, and recently a Region 5 summary, to OAQPS. I'm hoping to get a call set up either this week or next with HQ people to discuss a couple technical issues. MPCA is aware of the protocol but we've not had any substantial discussion with them about it.

Randy

Any thoughts on this protocol?
I have my state call next week and MPCA will ask for an update.
If you can reply to me by noon 7/23 with the status that would be great,

Thanks,

From: Stillman, Sarah

Hello Sarah,

I should be able to start taking a look at this today or early next week. It will take some time to digest. I'll probably do an initial review of the document before reaching out to Jeff Bennet for supporting files

Randy

MULTIPLE RECIPIENTS, DO NOT "REPLY ALL"

Dear Ms. Stillman:

Responding to your letter dated April 3, 2018, and following up on our meeting of January 11, 2018, please find the attached letter from me along with a Modeling Protocol prepared by Barr Engineering. I have copied on this email your modeling staff Daniel Schaufelberger and Randall Robinson, as well as Corey Boeck from the MPCA, USG's environmental consultants, and USG's plant and environmental management staff. A paper copy of the attached letter and the Modeling Protocol are also being delivered to your office.

I have also been asked to share the following note for your modelers:

Please note that the modeling protocol submittal does not contain supporting files. The size of many of these files precludes their submittal as part of this package. In addition, the UMORE Park meteorological data used as part of USG's modeling is not publically available and some additional arrangements will be needed to provide this information. USG encourages EPA modeling staff to reach out to Jeff Bennett, Barr Engineering, at (573) 638-5033 or jbennett@barr.com to request the supporting files for the modeling analyses and/or the Phase 1 modeling input/outputs and make the necessary arrangements for the meteorological information.

Please do not hesitate to contact me to discuss anything. I look forward to hearing from you after EPA has the opportunity to consider this submittal.

Respectfully yours,

Matthew E. Cohn
